

Mental Conference

7th Power Magist Spell (Alteration)

Time (SF): 7	Range: Touch + 100 m per level
Components: S (touch)	Area: Caster + one subject per level
Duration: One hour + 1 round per level	Effect: Mental forum
Save: Automatic	Notes:

This effect lets the caster establish a mental conference with other willing subjects of human or demi-human intelligence. A common language is helpful but not necessary – the mental mesh can transfer “pictures” and ideas without using words. Each participant only sends the thoughts and emotions he wants to send; hidden thoughts are not sent. The mesh does not extend across planar borders except the ethereal/prime border.

To include participants in the conference, the caster must first touch each intended participant and the participant must enter the conference willingly. Each participant can leave the conference at any time. One subject per level can be part of the conference, in addition to the caster himself. If a participant leaves the conference willingly or by moving too far away from the caster, the participant can only be rejoined to the conference by the caster touching him again. Once a participant has joined the conference, mental communication will work as long as that participant stays within 100 m per caster-level of the caster and on the same plane or on the ethereal/prime plane if the caster is on the prime/ethereal plane; in other words the communication will not work across any planar borders except the border between prime and ethereal planes.

Developed by Jean and Keflin as an alternative to the psionic *Conference* manifestation.
